**Cadmus Communications' India-Based Content Operations
(KnowledgeWorks Global Limited)
Awarded ISO/IEC 27001:2005 Certification**

Richmond, Virginia (August 17, 2006) - Cadmus Communications Corporation (NASDAQ/GM: CDMS) today announced that KnowledgeWorks Global Limited ("KGL"), its wholly owned India-based content processing subsidiary, has been awarded ISO/IEC 27001:2005 certification to protect the confidentiality, integrity and availability of information assets for its customers in a global environment. KGL provides copy-editing, composition and data conversion services to scholarly, professional and educational publishers from facilities in Mumbai and Chennai, India.

"This certification will help us continue to enter new content markets and sustain the aggressive growth we are experiencing at KGL," stated Bruce Thomas, president and chief executive officer of Cadmus. "The level of interest from organizations wishing to partner with service providers who offer a formal information security management system that is compliant with international security standards continues to expand. This achievement showcases KGL's commitment to protect publishers' content from a wide range of increasingly sophisticated global threats to information systems whether from deliberate, accidental, external or internal sources."

"Our approach to information security is strategic and operational, as well as technological," added Atul Goel, president and chief operating officer of KGL in India. "The full implementation of ISO/IEC 27001:2005 compliant security policies throughout our India-based facilities assures effective security measurements are in place. Preventing unauthorized disclosure of information stored or processed on KGL's information systems is paramount to providing the level of customer service our clients require. This level of excellence in security hinders accidental or deliberate destruction of data on a 24x7 global basis."

ISO/IEC 27001:2005 replaces BS7799-2 and is the international information security standard encompassing people, processes and technology systems through widely recognized best practices. It provides organizations a framework for building best-in-class Information Security Management Systems (ISMS) to protect and preserve information assets.

The requirements for KGL's ISO/IEC 27001:2005 certification were audited by BSI Management Systems, headquartered in London.

ABOUT CADMUS

Cadmus Communications Corporation provides end-to-end, integrated graphic communications services to professional publishers, not-for-profit societies and corporations. Statements contained in this release relating to Cadmus’ future prospects and performance are "forward-looking statements" that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Factors that could cause actual results to differ materially from management's expectations include but are not limited to: (1) the overall economic environment, (2) the equity market performance and interest rate environment, which can impact our pension liability, (3) the impact of price increases for energy and other materials and services affected by higher oil and fuel prices, (4) our ability to grow revenue and market share in the educational and government services markets, (5) significant price pressure in the markets in which we compete, (6) the loss of significant customers or the decrease in demand from customers, (7) our ability to continue to obtain improved efficiencies and lower production costs, (8) the financial condition and ability to pay of certain customers, (9) our ability to implement and realize the expected benefits associated with our equipment replacement and consolidation plan, including our ability to successfully complete certain consolidation initiatives and effect other restructuring actions, (10) our ability to operate effectively in markets outside of North America, (11) our ability to realize the tax benefits associated with certain transactions, and (12) our ability to implement and realize the expected benefits associated with your increased operations in Asia and the business opportunities available to the PeriscopeCadmus™ joint venture. Other risk factors are detailed from time to time in our Securities and Exchange Commission filings. The information provided in this release is provided only as of the date of this release, and we undertake no obligation to update any forward-looking statements made herein.
