American Academy of Pediatrics Awards 5-Year Contract to Cadmus Communications for End-to-End Publishing Services

Richmond, Virginia (November 7, 2006) – Cadmus Communications Corporation (NASDAQ/GM: CDMS) announced today that the American Academy of Pediatrics ('AAP') has awarded the company a 5-year contract to provide a full range of outsourced publishing production services for its three prestigious publications. The award includes services for AAP's *Pediatrics*, which has the highest impact factor, is the most-cited journal in its field, and is among the top 2% of most-cited scientific and medical journals. Cadmus will provide full issue management services for AAP including copyediting, composition, XML coding, printing, binding and distribution for both printed and online versions of AAP publications. These services are performed domestically for AAP, although Cadmus also offers flexible global workflow solutions on a per-title basis. In addition to this contract, Cadmus also provides commercial reprint sales, commercial reprint production, and medical textbook publishing services for AAP under separate agreements.

"We selected Cadmus because of its ability to provide an end-to-end solution to support our limited staff in the publishing division and because of the symbiotic working relationship we have developed over the years," stated Kerry O'Rourke, senior managing editor, Division of Scholarly Journals & Professional Periodicals at AAP. "We value highly this true partnership with Cadmus, a partnership that plays an integral role in helping us to disseminate critical information from the nation's leading child health experts in a timely and accurate manner."

Debbie McClanahan, Cadmus' executive vice president for service and market relations, added, "This award grew not only out of our long and successful association with AAP but also out of the key role we played in the recent and highly successful redesign of *Pediatrics*. With our depth of scholarly publishing expertise and our thorough understanding of AAP's publishing business, Cadmus was a stabilizing factor during this key initiative and seamlessly augmented AAP's relatively new publishing team throughout this challenging process."

"Publishers are looking for partners who can support the steady increase in page counts and the many new and emerging publishing models in the scholarly publishing community," stated Bruce Thomas, chief executive officer at Cadmus. "Cadmus has invested in the people, in the technology, and in the global resources to support these trends and to help our publishing customers both drive efficiencies and experiment with new publishing models on a title-by-title and on a global basis. We are thrilled that prestigious publishers like AAP continue to rely on Cadmus and continue to find value in our full service publishing services."

ABOUT CADMUS

Cadmus Communications Corporation provides end-to-end, integrated graphic communications services to professional publishers, not-for-profit societies and corporations. Cadmus is the world's largest provider of content management and production services to scientific, technical and medical journal publishers, the fifth largest periodicals printer in North America, and a leading provider of specialty packaging and promotional printing services. Additional information about Cadmus is available at www.cadmus.com.

ABOUT AAP

The American Academy of Pediatrics is an organization of 60,000 primary care pediatricians, pediatric medical subspecialists and pediatric surgical specialists dedicated to the health, safety and well being of infants, children, adolescents and young adults. Additional information about AAP can be found at www.aap.org.

"Cadmus...Serving Education, Science, Health"

Statements contained in this release relating to Cadmus' future prospects and performance are "forward-looking statements" that are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied by such statements. Factors that could cause actual results to differ materially from management's expectations include but are not limited to: (1) the overall economic environment, (2) the equity market performance and interest rate environment, which can impact our pension liability, (3) the impact of price increases for energy and other materials and services affected by higher oil and fuel prices, (4) our ability to grow revenue and market share in the educational and government services markets, (5) significant price pressure in the markets in which we compete, (6) the loss of significant customers or the decrease in demand from customers, (7) our ability to continue to obtain improved efficiencies and lower production costs, (8) the financial condition and ability to pay of certain customers, (9) our ability to implement and realize the expected benefits associated with our equipment replacement and consolidation plan, including our ability to successfully complete certain consolidation initiatives and effect other restructuring actions, (10) our ability to operate effectively in markets outside of North America, (11) our ability to realize the tax benefits associated with certain transactions, and (12) our ability to implement and realize the expected benefits associated with our increased operations in Asia and the business opportunities available to the PeriscopeCadmus™ joint venture. Other risk factors are detailed from time to time in our Securities and Exchange Commission filings. The information provided in this release is provided only as of the date of this release, and we undertake no obligation to update any forward-looking statements made herein.
