

# PRINTMASTER®

## DIGITAL WINDOWS

**DESIGNED SPECIFICALLY TO WITHSTAND HIGH HEAT**

### Uniform quality design delivering superior image quality in toner based applications.

Crystal clear heat-resistant window film that will not melt or crinkle when exposed to the heat and humidity given off of digital presses.

Selecting the right envelope is critical to maximizing press performance and end-product quality. This is especially vital when choosing window envelopes. **PrintMaster® Digital Window Envelopes** are designed specifically to meet the exacting demands of today's digital envelope printers.

- Available in diagonal seam and side seam construction.
- Custom configurations are available, with minimum order of 5,000 for most special-make items.
