

PRINTMASTER®

TREATED INKJET

**NO MATTER WHAT YOU SAY INSIDE,
THE FIRST THING YOUR CUSTOMERS SEE IS THE OUTSIDE.**

Superior runnability, uniform quality and excellent printability for Ink Jet Technology

Engineered for superior performance, exceptional image fidelity, consistent post-processing and unmatched value, our inkjet papers meet the demanding needs of your digital applications.

When ink touches the surface of ordinary paper, pigment particles are absorbed deep into the porous sheet, thereby reducing optical density.

With **Printmaster Treated Inkjet**, your ink adheres without diluting pigment particles into the paper.

Readily Available Web Sizes: #10 Poly (SKU: 74531) | #10 Regular (SKU: 74530)
